

Free Memory Screening at the Mission Hills-Hillcrest Library

by Sharp Neurocognitive Research Center

First Monday
of Each Month
noon-3 PM

If you are concerned about changes in your memory, the Sharp Neurocognitive Research Center is offering free screenings to help detect early signs of memory loss and other cognitive issues.

During the screening, an experienced specialist will discuss memory concerns and perform specialized tests to measure memory and other brain functions. Results may indicate whether further evaluation is needed or provide a baseline for future testing.

Advance registration is required. Register with library staff. Screenings are limited to people age 55 and over.
